Abstract.

Covid-19 is a positive single strain RNA virus that infects the respiratory tract. This virus spreads quickly, the only way is to prevent it. As time progressed, the conditions of transmission became more widespread and took many victims, ranging from adults, teenagers to children. This virus can attack anyone, this virus can also attack children with special needs. Children with special needs are children with special characteristics that are different from children in general without always showing mental, emotional, or physical disabilities. One of them is mental retardation. The more widespread the spread of the COVID-19 virus, the application and knowledge of health protocols must also touch the mentally retarded. This obstacle will affect them to adjust to the implementation of health protocols every day and homework for SLB C Muzdalifah to provide a safe place for students. Prepare students and teaching units in the implementation of New Normal Education. And Educate students so that they apply health protocols at all times. The approach method used in this community service is socialization through posters of health protocols and placement of hand sanitizers. Information on preventing the spread of covid 19 through posters and placing hand sanitisers in the SLB C Muzdalifah area as a reminder and teaching regularity in implementing health protocols. This information is expected to become a habit in the New Normal.

I. INTRODUCTION

Covid -19 is a new viral infection that infected 90,308 people as of March 2, 2020. The virus, which is a positive single strain RNA virus, infects the respiratory tract. This virus spreads quickly, the only way is to prevent it. This virus can attack anyone, this virus can also attack children with special needs (ABK). Children with special needs are children with special characteristics that are different from children in general without always showing mental, emotional, or physical disabilities. One of the crew members is mentally retarded. The more widespread the spread of the COVID-19 virus, the application and knowledge of health protocols (prokes) must also touch children with special needs (ABK), as stated in Permendiknas No. 70 of 2009 Article 3 paragraph (1) concerning inclusive education.

II. METHODS

The approach method used in this community service is socialization through posters and hand sanitizers that are placed in several areas of SLB C Muzdalifah. This

Poster

Poster is a publication media that combines writing, images, or a combination of both with the aim of providing information to the public. According to the Big Indonesian Dictionary (KBBI), posters are placards that are installed in public places which can be in the form of announcements or advertisements. Posters are usually installed in public places. bustling and strategic. Because of its inviting nature, it is very important to place the poster in an easily visible place. The selection of placing posters in crowded places looks like the entrance and exit of SLB C muzdalifah provides information that it is ready to deal with the prevention of covid -19. Giving posters that are placed exactly where the hand sanitiser is to remind and hasten to wash hands with hand sanitiser. The aims of the posters include:

1. Educational units become aware of how to prevent covid 19 being implemented.
2. The Education Unit becomes more prepared to face the New Normal Education.
3. Remind the public about what should be done.
4. Remind people to avoid things that harm themselves and others.

The placement of hand sanitisers is expected to prevent the spread of COVID-19, this is in accordance with the recommendations of the Health protocol and appeals from the government, one of which is washing hands regularly. Use soap and water, or an alcohol-based hand sanitizer.

IV. CONCLUSION

Information on preventing the spread of covid 19 through posters and placing hand sanitisers in the SLB C Muzdalifah area as a reminder and teaching regularity in implementing health protocols. This information is expected to become a habit in the New Normal.
